Kent --

We Want Your Input on LADWP's Water and Power Rate Request

The Los Angeles Department of Water and Power is proposing a [water and power rate increase](#) to take affect over the next 5 years. This proposed increase would be used to invest in infrastructure replacement and upgrades to maintain reliability, continue the transformation of our water and power supplies to meet mandates and protect against drought and natural disasters, and improve the overall customer experience, all while committing to keep rates low in comparison to other utilities.

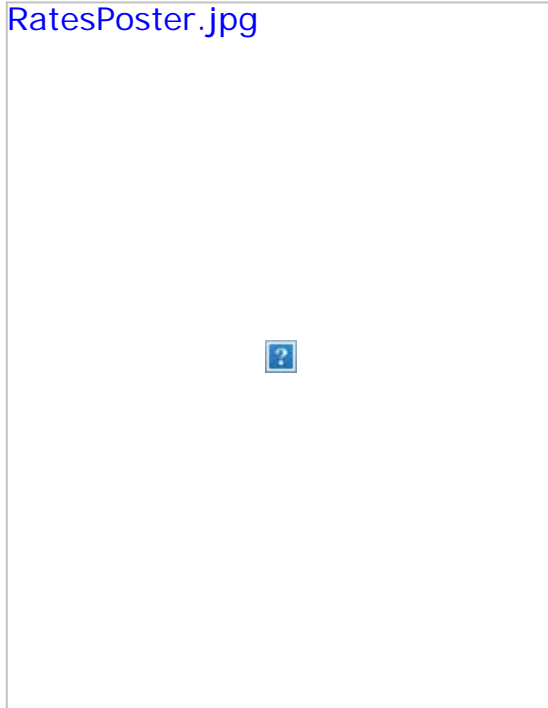

LADWP has begun a four-month effort to reach as many customers and stakeholder groups as possible to discuss the needed investments and get input. As part of this outreach, we launched a new website, [MyLADWP.com](#). Please visit the site to sign up so you can stay informed on the rates proposal, upcoming community meetings, and to learn more about the planned infrastructure investments and how we will keep our rates among the lowest in the industry.

We also invite you to join us [in person or online](#) for a briefing on the proposal on Wednesday, July 22, at 6 p.m. in LADWP's John Ferraro Building in downtown Los Angeles. The meeting will include a presentation, followed by ample time for questions. If you prefer to view it online, web streaming will also be available. Just [RSVP](#) so we will

know you plan to be there. Additional community meetings will be announced soon.

Please join us. Visit MyLADWP.com today and on a regular basis. Attend [our public meetings](#), hear from our team and share your input. Stay up to date on the very important topic of water and power infrastructure investments and rates.
